Art Unit 2502

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The disclosure is objected to because of the following informalities:

- 1- On page 1, line 3, --now abandoned-- should be added after "1985".
- 2- On page 5, line 14, "64" should be --62--.
- 3- On page 5, line 30, "38" should be --48--.
- 4- On page 3, line 15, "Fig. 11H" is missing.

Appropriate correction is required.

The drawings are objected to because numeral reference 22 is not shown for the knob in Fig 1 as it is indicated in the specification. Correction is required.

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the

time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 1-11 rejected under 35 U.S.C. § 103 as being unpatentable over Sridharan et al.

Stridharan et al disclose enclosure for and/or enclosure containing a ballast circuit substantially rectangular in shape and is subdivided into sections such as transformers and printed circuit, etc. Stridharan et al disclose all the subject matter claimed except for the material used to make the transformer core and ballast wall, material such as "ferro-magnetic" or "steel", which is just the matter of design consideration to use such different material for construction.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nilssen discloses an rectangular electronic ballast unit with sensor and circuit.
